SANITIZING AND HANDSFREE EQUIPMENT

Harscan has developed a range of products and solutions to assist with the regulated requirements in terms of sanitation and general safety.

Our products and solutions are as follows:

MISTING TUNNELS

Our misting tunnels kits consists of the collapsible structure, 500lt solution tank, misting equipment and all relevant piping, valves and fittings. We are only using the highest quality products to ensure effective, reliable and user- friendly solutions for this application.

We can also custom build tunnels for a more permanent installation with see through Perspex tunnels and aluminium structures.

DISINFECTING FOOT BATHS

We manufacture custom made foot disinfecting baths. The baths are made from strong durable HDPE sheeting.

We also make railing versions that assists and prevent slippages.

These can also be custom build to the client's preference.

FOOT OPERATED SANITIZER DISPENSER

These affordable dispensers are manufactured to decrease exposure to the minimum. The units are made rugged using strong steel profiles to ensure it can withstand volumes of people as well as abrasive areas as mines, construction sites etc.

We also manufacture a shorter version for schools, and pre-schools.

The bottle holder is high adjustable to accommodate various bottle sizes.

HAND SANITIZERS

Our hand sanitizers are manufactured to the highest standards and are compliant with the relevant regulations pertaining to hygiene standards.

Our packaging ranges from 500ml spray bottle, and pump bottle-dispensers. We also supply in bulk.

We also have supply options with our dispenser options.

80% Alcohol Hand Sanitizer quality product manufactured to high standards and certified.

OTHER PRODUCT DEVELOPMENTS.

We are also busy developing and finalizing the following products:

- Sensor operated faucets and flush valves.
- Foot operated hand wash units (external)
- Thermometers.
- Custom plumbing designs to customer standards.

SANI TOWER

The Sani Tower is an innovative product designed for multiple environments, including retail, industrial, hospitality etc.

The unit is tamper-proof and the unique dispensing system allows for up to 15000 doses per 5lt refill which is much more economic than the run of the mill applications.

These units are perfect for high traffic areas where supervision of the units are difficult.

We have a rental option on these units as well as a maintenance agreement.

Please feel free to contact us if you require any additional info or pricing.
